

Product Features

- Particularly suitable for time-controlled flushing of terminal or infrequently flowing pipe sections
- to avoid stagnation acc. to standards and guidelines
- for carrying out water change measures in PWC and PWH
- for shutting off drinking water installations when not in use
- For connecting a maximum of one KHS flushing group
- with detachable visual and / or acoustic error signal
- with potential free contact for error transmission to BMS
- with manual override button on control box
- for wall installation
- max. 16 programmable events
- display with background light

Technical data

- min. ambient temperature 0 °C
- max. ambient temperature 50 °C
- protection class IP54
- power supply 230 V AC
- switching capacity 230 V, 2 A
- floating alarm relay, max. 230 V, 2 A
- own consumption 3 W
